

Easy-to-be-torn Plastic Film Sticker (for over lamination)

Feature

We are pleased to introduce our new item to you.

It can be torn easily by hand because the face stock is special Poly-orefin film which is easy to be torn.

Besides you do not need to care about the direction of your label because it can be torn to machine direction (rolling direction) as well as cross direction(Fig.1).

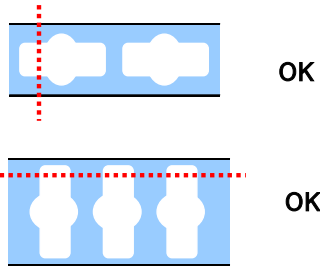

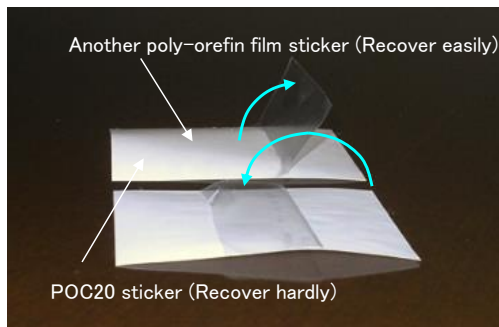

Fig.1

Compared with other plastic films, it can hold its transformation. Through this property, it can hold the shape as it is embossed.

Embossed label by POC20 sticker

And it's superior to other general plastic film sticker brands in light resistance because the adhesive is UV protection type.
